## DETAILED ACTION

### *Election/Restrictions*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-6, drawn to a galactosamine derivative of formula (I).

Group II, claim(s) 7, drawn to a method for inhibiting activity of a sulfotransferase, comprising a galactosamine derivative of formula (I).

Group III, claim(s) 10 and 11, drawn to a medicament comprising a galactosamine derivative of formula (I).

Group IV, claim(s) 12, drawn to a method for treating or preventing diseases caused by acceleration of sulfotransferase activity, comprising administering a galactosamine derivative of formula (I).

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The technical feature linking groups I-IV is a galactosamine derivative of formula (I), shown below, wherein  $R_1$ ,  $R_2$  and  $R_5$  each independently represents  $SO_3^-$  or H, and at least one of them represents  $SO_3^-$ .  $R_3$  represents H, acetyl or  $SO_3^-$ ;  $R_4$  represents H or an alkyl/alkenyl/alkynyl/acyl/aryl/aralkyl group; and X represents O, S, NH, or  $CH_2$ .

Art Unit: 1609

Vauzeilles, et al. (Tetrahedron Letters 42 (2001) 7567-7570) teach a compound as shown below [page 7568, Scheme 2].

In this case, X represents O,  $R_4$  represents an allyl group,  $R_5$  represents  $\text{SO}_3^-$ ,  $R_1$  represents H,  $R_2$  represents H, and  $R_3$  represents an acetyl group.

Therefore, the technical feature linking the inventions of groups I-IV does not constitute a special technical feature as defined by PCT Rule 13.2 as it does not define a contribution over the prior art.

Accordingly, groups I-IV are not so linked by the same or a corresponding special technical feature as to form a single general inventive concept.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Layla Bland whose telephone number is (571) 272-9572. The examiner can normally be reached on M-R 8:00AM-5:00PM UST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cecilia Tsang can be reached on (571) 272-0562. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
